

Our meaningful and powerful relationship with our environment defines who we are. Our commitment to our values and our mission to develop vibrant communities is unwavering. We believe in conducting business in a sustainable manner that doesn't negatively impact our future and

protecting our wondrous surroundings for all to connect with and enjoy, responsibly. We proudly support Sustain Tahoe in it's efforts for environment stewardship and eco-tourism.

Thank you for joining us with your support. ~Sabrina Belleci

The Walk Softly, Respect Wildlife and Share Gratitude activities require outside funding.

Proceeds from the sale of all products support our efforts to create more Earth Walk sites, have safe Wildlife Corridors and promote Geotourism throughout the Lake Tahoe watershed.

Thank you for caring and sharing!

An Earth Walk Guide & Journal

*A slow stroll along
a wildlife corridor*

This is a Washoe inspired EarthWalk...

*...to honor the
"Wa She Shu"
Lake Tahoe's
original people
who have lived
here for over
10,000 years!*

Early survival in the Lake Tahoe basin depended upon being able to live in harmony with nature.

The Washoe needed to adapt to the rhythm of the cycles and seasons which required them to practice active observation, awareness and a sensitivity to survive successfully in the harsh mountain winters.

Just imagine living here without the modern infrastructure you depend on.

"Ha-lung-gnah wah leh-iw lay-ee Wa-shih-sh-iw"

Translation: "WE ARE STILL HERE!"

Melba Rakow

with the creative force

**SUSTAIN
TAHOE**

Since 2007, Sustainable Tahoe's (National Geographic appointed) volunteer team, of Jacquie Chandler and Penelope Curtis, has worked to actively create, host and demonstrate ways people can: Walk Softly, Respect Wildlife and Share Gratitude.

The Earth Walk is a 'Walk Softly' project. Your participation and donations support this effort. We encourage you to please share your experience at: www.sustaintahoe.com/contact

Inspired to do more?

Wildlife Awareness signs, made in Tahoe, attach to bear boxes, walls or posts and help people remember Tahoe and the surrounding mountain regions are a shared habitat with the wildlife.

They are available at: <https://www.sustaintahoe.org/respect-wildlife.html>

Over the past 4 years, we have been working with environmental & wildlife organizations to bring awareness to the importance of a balance in nature. We created gratitude ornaments to do this.

Share a Gratitude Ornament. Available at stores throughout the watershed: <https://www.sustaintahoe.org/share-gratitude.html>

John Rupert

Great Grandson of Moses Rupert, a Shaman of the Washoe.

The making of a "Galis Dungal" a traditional Washoe shelter.

by

Ben Rupert

First peel bark from a cedar tree that has seasoned for over a year.

Then take young cedar trees (14 ft) & lash them together.

Finally, place cedar bark against the frame.

The Galis Dungal is now ready!

What is an Earth Walk?

An **Earth Walk** is a mindful, respectful stroll along a creek, in a field, or through a forest where you open your senses to messages, movements and intricate details woven into the web of life, as you recognize yourself in the water, wind and beauty breathing through you.

A very slow and silent (if possible) meander (wandering) along the path will enhance your ability to become immersed in the cacophony of sights and sounds engulfing you. Journal your reflections in the spaces provided if you like and spend a few moments in the *Galis Dungal* in further reflection.

Earth Walk & Forest Bathing

Forest bathing originated in Japan in the late 1980's and was coined by the Japanese Ministry of Agriculture, Forestry and Fisheries as "Shinrin-yoku," which roughly translated means "Forest Bathing", taking time to immerse yourself in the forest atmosphere.

Earth Walk combines the spirit of Forest Bathing with how Indigenous people lived close to the earth. Early survival depended upon learning the "Landguage" of an ecosystem and the wildlife living there. Once you tune into the subtle messages and guidance constantly coming from the land, water, plants, wildlife and air, your relationship begins to deepen with wonder and respect.

bear
You will see more
Washoe words
throughout the book.

Why Take an Earth Walk?

A one to two hour **Earth Walk** or **Forest Bath** can refresh your mind, calm your nervous system, restore biorhythms (mindful breathing helps here). It restores your conscious relationship to nature. Nature immersion is now being prescribed by some physicians, and is covered by some insurance companies recognizing the health benefits. (note: Japan and China are leading on this.)

What to bring on an Earth Walk?

Sense of Wonder: Notice everything as a miracle in motion or stillness.

Mindfulness: Give yourself a break from stressful internal dialogues.

Timelessness: Not a hike, race or power walk. Not how far, but how deep. Savor each breath, step and movement. Let the forest move you.

Heighten Senses: Open up your senses to a deeper level of listening, touching, smelling and feeling as you saunter along the path, in and out of landscapes and soundscapes. Feel the earth, water and wind. Breathe with your ears, eyes, nose, mouth, hands and feet.

Wander: meander/saunter aimlessly and slowly. Let your inner compass guide...listen to messages from the trees, wind, water...follow your feet.

*Like fire
I consume
and I radiate*

Washoe fish drying rack

I am a Lahontan Cutthroat Trout
Ahh-tub-ih

"Tahoe creeks are my nursery from mid-March through October. I am a threatened species that for thousands of years spawned in these creeks. My forefathers flourished in Lake Tahoe and each spring, spawning pairs migrated up the creek to the streambed nursery. After I clean the dime sized pebbles with my tail, I lay my eggs in a cluster at the bottom of the stream bed. I may create more than one nest, which is called a "Redd," and I can lay over a thousand eggs in one spawning season."

For thousands of years our natural cycle has nourished this Wildlife Corridor of bears, bobcats, raccoons, and eagles. The Washoe Tribe respected the streams by caring for them on an annual basis and harvested mature Lahontan Cutthroat from Lake Tahoe.

Gaze into the moving water of the stream near you.

You may see small fish flitting about that may be my babies! Now see if you can find the food I love...worms, bugs & maybe some very small mushrooms.

Wildlife encounters: do not disturb

If there is a bear in the creek - back away, slowly. Give the bear space.

If possible only carry water. Do not bring food!

Please do not throw anything into the creek or disturb the edge of the creek, because the eco-system needs to stay intact to heal and thrive.

You are welcome to sit on stumps, logs or the ground near the creek, as long as you walk carefully, to avoid crushing plants trying to grow. It's like taking your shoes off before entering someone else's home.

Many species are working hard to co-habitate in this ever-changing urban interface space. You are invited to experience the subtle movements of this ecosystem to experience yourself as part of it. Just show your respect and leave it as you found it, unless you see trash - then please help us by taking it to one of the Bear Box trash cans near each bridge.

Thank you for being willing to immerse yourself in this special watershed. Hopefully, your experience inspires a level of caring and sharing that will ensure what you do helps to keep this National Treasure reflecting its Beautiful Blue.

Slow walks give you the opportunity to observe the many details that surround you.

yahh-gah

Take time to look around you...pick up objects - pine cones, rocks, leaves, what ever captures your attention - what details do you see, how do they feel?

deh-eck

yigh

Draw your water visions or write a poem.

What is the shape of Water?

Do you see Water in this photo?

Take a moment to write a poem, observations or sketch a scene.

Does Water have a shape?

How many shapes do you think Water has?

Like water

A sense of time before the dinosaurs!

The Horsetail is a therapeutic plant used by the Washoe. It is also known as horse bristle, scouring rush, and shave grass. Horsetail is a legitimate living fossil that even predates the dinosaurs. Other foods & medicines are also here!

What can you see?
Hoot-tung-gwah-hezsh
Mih-gi-ih

and I blow~~~

Predator or Prey?
What do you think?

Dim-moon

If you sit quietly for a while, you may see the wildlife around you, hunting or being hunted.

Hoot-tzool-lih

Like the wind....I breathe

What comes into your mind when you think about this ancient plant & the dinosaurs?

Cottonwoods grow in a community, sending out roots that grow into trees.

Enter a community & take deep breaths to slow your body down.

What did you smell?
Moo deh smells berries & other plant foods.

Moo deh

Shhhhh...You might hear them talking.

What's that smell?
Oam-pahh-lulh heash-ih

The bark of a
Jeffrey pine is reddish
brown & when the warm sun
hits it, it can smell like
vanilla or butterscotch.

What did you hear?

Discover the heART in Nature

The Indigenous People spent time leaving their stories behind on rocks throughout the region. What story would you like to draw or tell?

I see you!!!
